Sumitomo Electric Industries, Ltd.

Sumitomo Electric Exhibits at ITS World Congress 2022

Sumitomo Electric Industries, Ltd. will showcase its products at ITS World Congress 2022, to be held in Los Angeles from September 18 to 22, 2022.

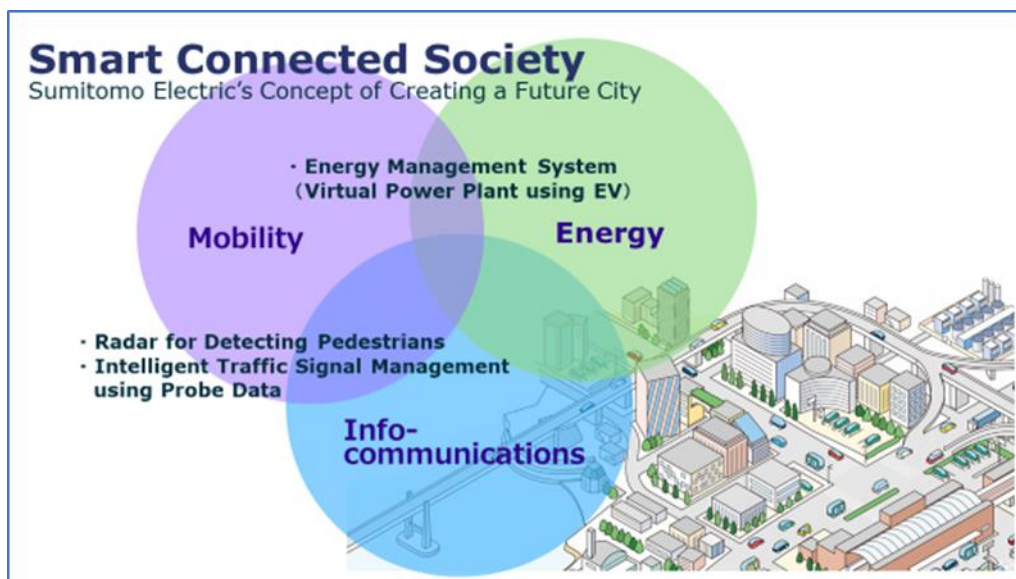

The ITS World Congress is a world conference for exchanging information on intelligent transportation systems (ITS) technologies and policies with the aim of solving traffic problems and creating business opportunities through the widespread use of the systems.

At the Congress, Sumitomo Electric will introduce solutions that integrate infocommunications, energy, and mobility under the theme of realizing a "Smart Connected Society," a society where people, goods, and social infrastructure are organically connected and friendly to people and nature.

The following two papers will also be presented:

- Detection of Congested Intersection Using Car-Probe Data
(from 15:00 to 16:30 PST in September 20, Session No. TS16)
- Advanced Traffic Management Using V2X Data
(from 08:00 to 09:30 PST in September 20, Session No. TS3, Co-authored with UTMS Society of Japan)

We are looking forward to seeing you at our booth.
